my creative journey

my creative journey

my creative journey

Over the past couple of years, I have been on a journey to go beyond just editing photos. The creative journey started with an online course in photoshop artistry. In this journey, I have explored new artistic techniques and tried to create digital art rather than just photographic images.

This exploration has helped me appreciate digital art created by others. I am now taking more creative freedoms with my work and slowly developing my artistry. It has also helped me improve my skills and allowed me stand apart from other photographers.

This book is a record of this journey. It has been an immensely fulfilling endeavour for me.

Celebrating Summer

These images were created in the long and dry summer of 2020. The images are compositions created using mostly local Australian flowers, leaves and birds. Each element was photographed separately and then placed to create the image.

Two Kookaburras on a gum tree

Front cover: Boat race

Altered Reality

Some of the images in this series depict imaginary landscapes or have been altered to create an alternate reality.

Dancer

Painterly

Cameras are good at recording all the details of the scene. In the painterly style there the emphasis is on the main elements of the image and the mood. I have used Photoshop tools to give the images a more painterly look.

Waiting

Blurred Cityscapes

In this series, I experimented with creative use of blur. Blurring certain parts of the image and bringing in focus elements without blur.

Yellow Cab
